Muhammad Huzaifa Karim

Karachi, Pakistan | karimhuzaifa590@gmail.com | +92 307 2851606 | **LinkedIn** | **GitHub**

OBJECTIVE

Aspiring Data Scientist with a background in Computer Science, passionate about Machine Learning and Artificial Intelligence. Leveraging a strong foundation in full-stack development and AI API integration, I am currently advancing my skills in Python, exploratory data analysis (EDA), and predictive modeling. Seeking a Data Science or AI Engineer internship in a fast-paced environment to build intelligent, data-driven solutions and contribute to cutting-edge AI workflows.

EXPERIENCE

10Pearls - MERN Stack Intern (Remote) (Sep 2025 – Nov 2025 | 2 Months)

- Developed and optimized full-stack features using React, Node.js, Express, and MongoDB; applied structured component design, clean REST architecture, proactive debugging and legacy refactors to boost frontend responsiveness and backend API efficiency by 20% and overall system reliability by 15% within an Agile workflow.
- Implemented secure authentication flows (JWT, Google OAuth), cloud integrations (Cloudinary), and authored 105+ automated test cases, improving code quality and stability by 30%.

EDUCATION

Sir Syed University of Engineering & Technology (SSUET)

Bachelor of Science – Computer Science (Oct 2022 - Jul 2026)

GPA: 3.35/4.00

Related Coursework: OOP, DSA, DBMS, AI, Operating System, Web Engineering.

SKILLS

- **Languages:** Python, JavaScript, TypeScript, C#
- **Data Science & ML:** Python, Pandas, NumPy, Scikit-learn, TensorFlow, Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering, Predictive Modeling.
- **Databases:** SQL, PostgreSQL, MySQL, MongoDB
- **Software Engineering:** React.js, Next.js, Node.js, FastAPI, Git, GitHub, Docker, CI/CD.

PROJECTS

EduVox AI | *Full-Stack Developer*

- Built AI voice tutoring platform with Next.js 15, React 19, TypeScript & OpenAI GPT-4 for 6 subjects.
- Integrated Deepgram speech recognition & ElevenLabs TTS for real-time voice learning sessions.
- Deployed with Clerk auth, Supabase PostgreSQL, CI/CD pipeline & responsive Tailwind CSS on Vercel.

Investigating Netflix Movies| *Data Analyst*

- Conducted exploratory data analysis (EDA) on a dataset of Netflix titles to filter, clean, and analyze trends in movie durations over the decades.
- Utilized Pandas for data manipulation and generated visual insights to identify feature correlations.

Customer Churn Prediction | *Machine Learning*

- Built a Python Tkinter desktop app for CSV-based churn prediction with preprocessing, encoding, and model persistence.
- Implemented repeatable training, evaluation, feature-importance plots, and an interactive GUI that shows churn predictions.

CERTIFICATIONS

Web & Software: Meta – Front-End Developer • Cisco – JavaScript Essentials 1
AI & Data: Google – AI Essentials • Google – Prompting Essentials • IBM – Python for Data Science, AI & Development • DataCamp – AI Fundamentals
Networking: Cisco – CCNA: Introduction to Networks
Game Development: HarvardX – CS50's Introduction to Game Development
